SECURE CODING TRAINING SIDE-BY-SIDE COMPARISON

SECURITY JOURNEY

SECURE CODE WARRIOR

TECHNICAL DEPTH OF CONTENT

Multiple levels of progressive lessons from basic vocabulary with enough depth to challenge Security Champions plus topic areas not covered by other providers (ie, AI/LLM).

Modules lean towards assessing existing knowledge and focus less on instruction.

VIDEOS WITH IMPACT

Conversational podcast-style videos featuring industry experts.

Brief videos are animated and designed to complement other training activities.

HANDS-ON TRAINING

Multiple types of lessons that require coding in a live web app to apply learned concepts. Coding exercises are tied to lessons to reinforce learning.

Limited library of hands-on coding labs with most modules only requiring a selection between code snippets without code writing.

CUSTOMIZABLE ROLE-SPECIFIC LEARNING PATHS

Customizable pre-built paths for more than 12 discrete development team roles.

Pre-built learning paths address basic learning requirements. Very little content available for non-developers which are required by PCI DSS and other regs.

GAMIFICATION

Tournament participants can include developers and all other roles. Leaderboard for lesson completion in addition to tournament results.

Tournament content is the same as educational lessons with strong usability and reporting.

SECURITY CHAMPION PROGRAM MANAGEMENT

Purpose-built function for tracking Security Champion practical hands-on activities.

No function for managing security champion activities.

ANALYTICS & INSIGHTS

Reporting that can be filtered on any user property and reports that show knowledge improvement.

Interactive reports that measure individual, team, and company performance.

CUSTOMER SUCCESS AND SERVICE

Every customer receives an assigned CSM who help you follow our guide for running an effective program. Learners have access to in-app chat during business hours.

Larger customers receive an assigned CSM who will respond to requests from customers.

PLATFORM CUSTOMIZATION

Platform logo customization and three pre-built themes and ability to create your own theme that permeates the learner interface and all reporting.

Supports platform logo customization.

ENTERPRISE-GRADE FEATURES

SOC2 compliant to protect data, SSO and SCIM support for easy user management, WCAG support across all lessons.

SSO and SCIM support, WCAG support on assessments only.
