

SECURE CODING TRAINING SIDE-BY-SIDE COMPARISON

Hosts hands-on learning activities for over 40 programming languages, frameworks, and technologies.

HANDS-ON TRAINING

Offers ~20 hands-on coding labs for Python and C#.

Creates conversational podcast-style videos hosted by industry experts.

VIDEOS WITH IMPACT

Videos are entirely animated and created to complement other training activities.

Provides a library of assessment questions and completion certificates.

ASSESSMENTS & CERTIFICATION

Assessments and certifications are multiple choice.

Offers a levels-based training approach with the ability to customize the platform themes. The platform also supports leaderboards and tournaments.

GAMIFICATION

Integrates gamification into the entirety of the platform by assigning points, a leaderboard, and supporting tournaments.

Automatically calculates a Learning Swing and Impact Reports to measure knowledge improvement and program effectiveness.

ANALYTICS & INSIGHTS

Has interactive reports that measure individual, team, and company performance.

Integrates with SAST/DAST, development, and security tools to create Adaptive Training Plans.

INTEGRATION & ECOSYSTEM

Integrates with SAST, development, and security tools for interrupt-driven training.

Offers all customers a Customer Success Manager and have access to support professionals to help with technical issues and to support learners in real-time via chat.

SUCCESS & SERVICES

Offers success services for accounts with over 100 users for onboarding, success planning, and metric reviews.

Ability to use pre-built learning paths, or to build custom paths that are easy to deploy and manage.

CUSTOM LEARNING APPROACHES

Pre-built learning paths are built to address the basic learning requirements. Customization capabilities are not intuitive.
